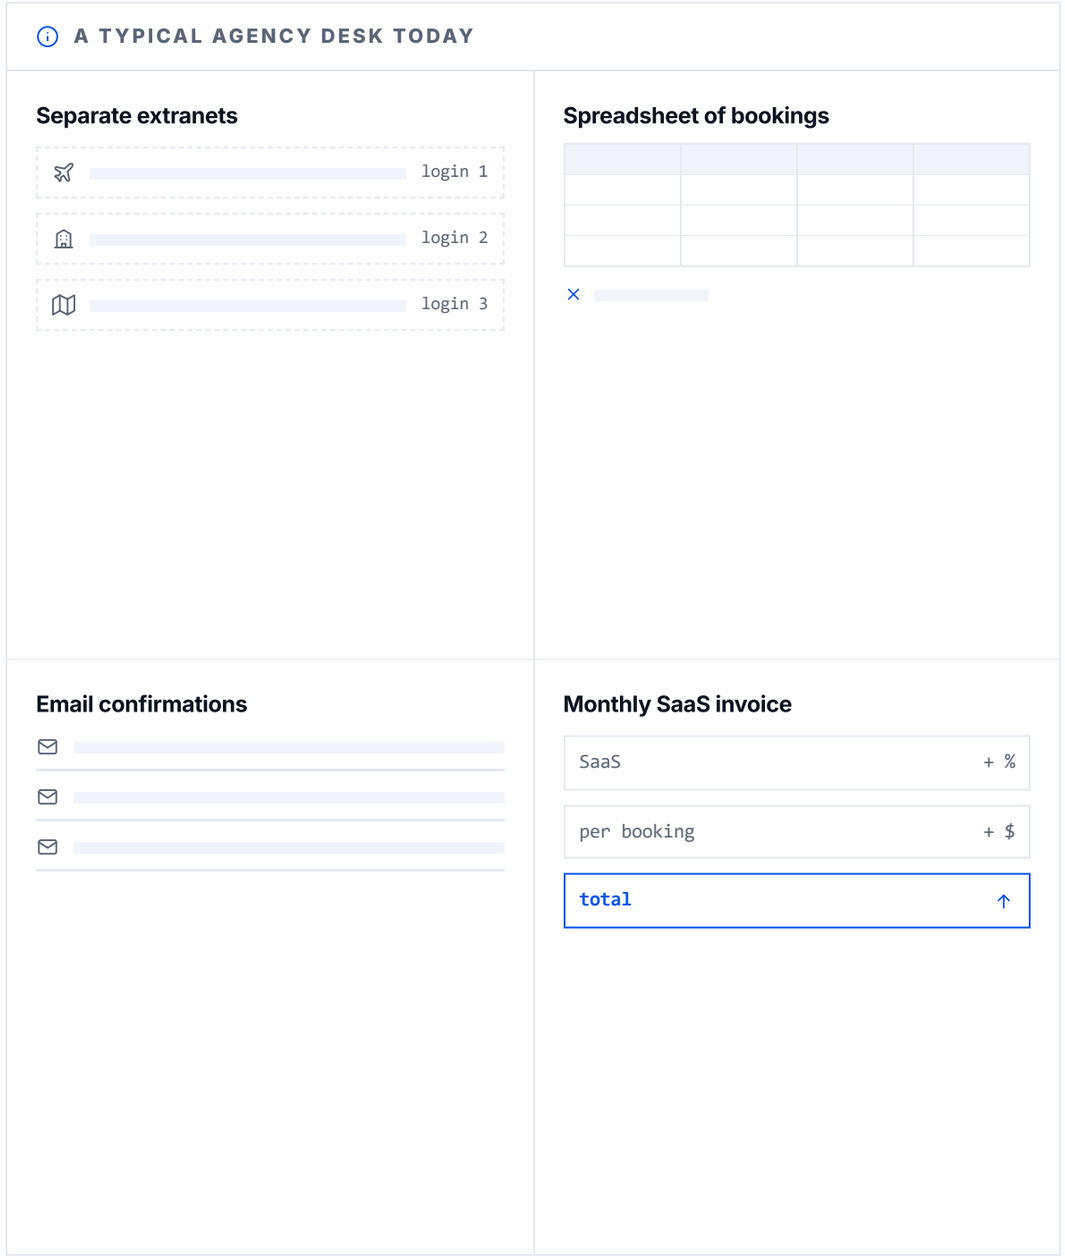
COMPANY DECK

PHPTRAVELS

Open source travel technology platform

Powering travel agencies, OTAs and tour operators since 2014



The problem

Travel agencies still operate on fragmented systems.

Multiple suppliers

Every airline, bed bank and tour supplier has its own extranet and login, so one quote means searching several screens.

Manual booking processes

Bookings are copied by hand into spreadsheets and emails, which costs time and causes errors.

No real ownership of code

The website belongs to a vendor, so the agency cannot change it, move it or build on it.

Expensive SaaS lock-ins

Monthly fees and commissions grow with every booking, and leaving means starting again.

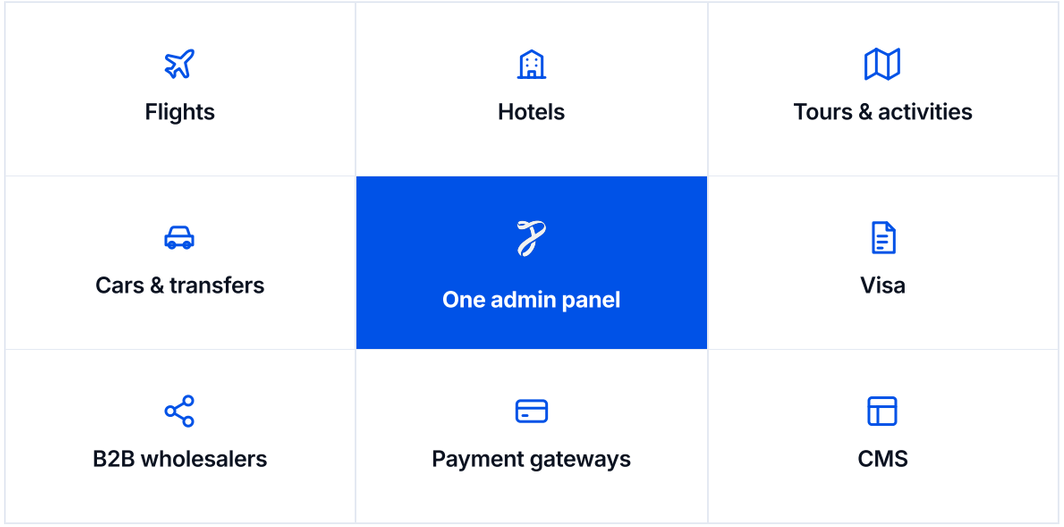
Limited scalability

Adding a new supplier, market, language or agent network turns into a new project.

The solution

One open platform. Full control. Unlimited scale.

- **B2C and B2B booking engine**
  A customer website and an agent portal on the same platform and inventory.
- **Multi-supplier API integration**
  GDS, NDC, hotel, tour and car suppliers searched and booked from one place.
- **Full source code ownership**
  You receive the complete source code with a one-time licence.
- **Self-hosted infrastructure**
  Runs on your own server and domain, with your data under your control.
- **Modular and scalable architecture**
  Switch modules on as you grow, from flights and hotels to visas and tours.



See it working in the Live demo or compare plans on the Pricing page.

Product features

Core modules and built-in capabilities for modern travel businesses.

Secured
- SSL and 3D Secure
- Protected external connections
- Anti-hacking protection

Payment gateways
- Major payment gateways
- Gateway test mode
- Easy gateway setup

Our values

Built on ownership. Driven by integrity. Focused on long-term growth.

At PHPTRAVELS, we believe serious travel businesses deserve more than rented software. They deserve control, transparency and infrastructure they can rely on for years.

01 Ownership over dependency

We build open, self-hosted systems because your platform, data and revenue should belong to you, not to a vendor.

02 Transparency in everything

Clear pricing, a clear roadmap and clear communication. No hidden commissions and no revenue-sharing traps.

03 Technical discipline

Clean architecture, scalable modules and an API-ready framework. We build for performance, not shortcuts.

04 Long-term partnerships

We are not a one-time software seller. We grow with our clients through expansion, integrations and enterprise scaling.

05 Continuous evolution

Travel technology changes fast. We keep improving security, integrations and performance to keep our partners ahead.

Team and office

The people who build, install and support PHPTRAVELS.

Lahore office · Pakistan

Developers, designers and support staff work side by side, so the team that writes the code also installs it and answers your tickets.

Meet the people on The team or read About us.

Contact

Talk to us about a demo, a quote or a custom project.

Both offices, the contact form and the right team for your question are on the Contact page.
